

# PRO-FIT PROTECT

## Water and stain repellent finisher

### Application

- Specially developed for wet cleaning application.
- For waterproofing of (rain)coats and (ski)jackets.
- For waterproofing of fire brigade, first aid or other protective clothing.
- To be used in soft water.

### Properties

- Excellent water repellent effects.
- During the treatment a polymer film is formed that facilitates stain removal in the next wash cycle.
- No staining on coloured fabrics.
- No deposits in ironers.
- Polymerisation is already initiated at a drying temperature from only 60°C.

### Instructions for use

Dose in the last rinse cycle 20-50 ml/kg dry fabrics. Use only soft water. Optimal results are obtained with slight acid conditions (pH 6,0 – 6,5) followed by a drying cycle at minimal 60°C.

Waterproofing can also be carried out under low temperature drying conditions e.g. overnight drying in fire brigade drying cabinets.

Needs to be done each cleaning cycle.

Remark: the product can also be sprayed on the fabric, but result will depend on type of textile and method of application.

### Physico-chemical properties

Density (20 °C): 1.02 g/ml  
pH-value (1%): ca. 6.0

### Composition & Safety

Composition: None

Not harmful

Meets European directives on the classification, packaging and labelling of dangerous chemical substances and preparations.

### Storage

Use above 5°C. Store above 0°C.

### Packaging

Canister 20 kg
